

AI Email Automation Platform (Investor One-Pager Investor Pitch)

Product Name

Triange AI – Autonomous AI Email Automation System

Tagline

AI agents that read, understand, and respond to emails instantly.

Problem

Businesses lose time and opportunities due to manual email handling:

- Slow response times reduce conversions
- Support teams are overloaded
- Follow-ups are inconsistent
- Existing tools are complex and inefficient

Solution

An AI-powered email automation system that:

- Reads incoming emails
- Understands intent (lead, support, meeting, follow-up)
- Generates human-like responses
- Sends emails automatically
- Tracks engagement analytics

Key Features

- AI auto-reply system
- Smart email classification
- Workflow automation (no-code)
- Real-time analytics dashboard
- Gmail integration
- AI agent-based processing

Target Users

- Startups
- Sales teams

- Customer support teams
- Freelancers
- Marketing agencies

Business Value

- Saves 60–80% communication time
- Improves response speed
- Increases conversion rates
- Reduces manual workload

Tech Stack

- n8n (automation engine)
- AI models (OpenRouter / GPT)
- Gmail API
- Firebase (database)
- React dashboard

Vision

To become an AI-first communication operating system for businesses.
